

Main Test - 5000km - Number of chains worn to 0.5% wear replacement mark to complete test
***Lower is better**

Main test comprises of 5 x 1000km blocks.

Block 1 has no contamination
 Block 2 includes dry contamination (dry offroad cycling)
 Block 3 - no contamination
 Block 4 - Wet contamination - Harsh wet conditions
 Block 5 - No contamination
 Refer to information above for further details on test
 Refer to Full test protocol Brief for a complete
 Breakdown of all intervals, re lubrication,
 contamination addition etc.

Dry offroad conditions test - Number of chains worn to 0.5% wear replacement mark per 5000km
***Lower is better**

Wet conditions test - Number of chains worn to 0.5% wear replacement mark per 5000km
***Lower is better**
